

# **SUMMONER Application**

## **UX & Feature Enhancement Analysis**

### **1. User Interface Assessment**

#### **1.1 Login Screen**

##### **Current Capabilities:**

- Clean and minimalist layout
- Basic login form
- Registration prompt
- Payment verification mechanism

##### **Enhancement Recommendations:**

##### **Authentication Improvements:**

- Add “Create Account” option
- Include “Forgot Password” functionality
- Implement “Remember Me” checkbox
- Support third-party login (Google, GitHub)
- Display password requirements dynamically
- Integrate success/error animations for login attempts

##### **Visual Enhancements:**

- Include loading states during authentication
- Implement real-time form validation feedback
- Add password strength meter

#### **1.2 Main Dashboard**

**Current Features:**

- Clear navigational layout
- Agent control panel

**UX Enhancement Suggestions:****Navigation & Usability:**

- Performance tracking interface
- Integrated wallet display
- Add global search functionality
- Include a recent activity feed
- Allow customizable dashboard layouts
- Implement keyboard shortcuts for power users

**Visual Feedback & Guidance:**

- Provide tooltips for advanced features
- Display progress indicators during processes
- Add system-wide success/error notifications
- Offer interactive product tours for onboarding

**2. Feature Review & Functional Expansion****2.1 Agent Management****Current Capabilities:**

- Agent import/build/launch functions
- Basic management interface

## **Recommended Enhancements**

### **Import Functionality:**

- Real-time import progress tracking
- File validation with preview
- Maintain import logs/history

### **Launch Functionality**

- Pre-launch validation checklist
- Launch confirmation prompts

## **2.2 Management Dashboard**

### **Current Capabilities:**

- Friends/Foes system
- Wallet tracking
- Basic stats and graphs
- Network visualization

### **Proposed Feature Additions**

- Real-time performance dashboards
- Custom report builder
- Data export (CSV, PDF, JSON)
- Alert system based on thresholds
- Long-term trend visualization

## **2.3 Hosting Interface**

### Current Capabilities

- Protocol selection options
- Restriction rules
- Active host list
- Server creation tools

### **Suggested Enhancements:**

- Detailed resource consumption metrics
- Auto-scaling support

## **3. User Experience Workflows**

1. Welcome screen with key features overview
2. Interactive product tour or walkthrough
3. Access to sample agents/templates
4. Concise quick-start guide
5. Setup checklist to ensure environment readiness

## **4. Visual & Interface Design**

- Light/Dark mode toggle
- User-defined color schemes
- Full mobile compatibility
- Optimized layout for tablets
- Enhanced desktop workspace UX
- Touchscreen responsiveness

## **5. Accessibility Standards**

### **User Assistance Tools**

- Contextual help within each module
- Video walkthroughs and tutorials
- Step-by-step interactive guides
- Comprehensive FAQ section
- Integrated live support chat
